

ESP-Me Enhanced Modular Controller

RAIN BIRD®

The enhanced Rain Bird® ESP-Me offers new features so easy to use, you'll actually use them.

Application:

With vibrant colors, easy-to-read text, oversized LCD display and Extra Simple Programming, tailoring a watering schedule for your unique landscape is foolproof.

Outstanding Results:

- ESP-Me offers One-Touch Watering, giving you an easy way to turn the system on. Just press and hold the teardrop button with the dial in the AUTO position.
- When the seasons change, reduce or increase watering with the Seasonal Adjust feature.
- The Total Run Time Calculator can ensure the morning watering is finished before the family wakes up, or reduce run time to comply with local water restrictions. This feature calculates the total number of minutes the controller is scheduled to run for the first start time of any program.
- To keep the landscape dry for a party, or if Mother Nature is doing the watering for you, easily postpone irrigation for up to 14 days.
- The Bypass Rain Sensor by Station feature is ideal for a landscaped area under an eave or deck.
